varying tuning input signal is independent of a signal to be amplified by said power amplifier," applicant would respectfully ask the Examiner to consider that this claim before the present amendment at least could be interpreted to mean what it now more clearly means with the amendment provided herein, that said time varying tuning input signal is independent of that **amplified signal**. Also, since the difficulty cited by the Examiner with claim 29 is resolved with the interpretation that claim 1 was referring to the amplified signal rather than the signal to be amplified, applicant would ask the Examiner to consider that no further consideration or search is now needed. This is especially the case since, as shown herein above, the prior art references do not teach or suggest power amplifiers and since with the present clarifying amendment the application is in condition for allowance.

It is believed that the claims are in condition for allowance. Therefore, applicant respectfully requests favorable reconsideration. If there are any questions please call applicant's attorney at 802 864-1575.

Respectfully submitted,  
For: Raab
